## HOW IT WORKS

Deterra® is a simple and safe medication disposal system that can be used at home or in a clinical setting. It protects our environment and prevents drug abuse by immediately and permanently deactivating and disposing of unneeded pills, patches, liquids, creams and films.<sup>1</sup>

The patented three-step Deterra Drug Deactivation System is powered by proprietary organic activated carbon to render drugs inert and safe for disposal in the household trash.

**1**  
Tear open pouch – do not remove inner pod(s). Place unused medications inside.

**2**  
Fill pouch halfway with warm water and wait 30 seconds for air to release. Some foaming may occur.

**3**  
Seal pouch tightly, gently shake and dispose of in normal trash.

<sup>1</sup>To deactivate and dispose of transdermal patches, attach sticky side of the patch to a facial tissue and insert into Deterra pouch.
